

Certified Information Security Manager (CISM)

Duration: 4 Days

Method: Instructor-Led (ILT)

Certification: Certified Information Security Manager

Course Description

This CISM exam preparation course is designed to prepare professionals for the exam. This certification is an audit professional certification sponsored by the Information Systems Audit and Control Association (ISACA®). A CISM Certification is offered to professionals who prove their exceptional skill and judgment in IS audit, control and security profession in the CISM Exam. The course focuses on the key points covered in the latest CISM Review Manual and includes class lectures, group discussions/activities, exam practice and answer debriefs. The course is intended for individuals with familiarity with and experience in information security management.

Target Audience

This course is intended for:

- Information Security (IS) Practitioners
- IS/IT Consultants
- IS Managers
- Security Professionals
- Chief Information Officers
- Professionals aspiring to attain the CISM designation

Prerequisites

There are no prerequisite requirements for taking the CISM course or the CISM exam; however, in-order-to apply for the CISM certification, the candidate must meet the following requirements as determined by ISACA:

- Five (5) or more years of experience in information security management.
- Waivers are available for a maximum of two (2) years.
- Knowledge and understanding of information security architecture and technology.
- Previous managerial experience is helpful but not required.
