40349: Windows® Operating System Fundamentals

Duration: 3 Days
Method: Instructor-Led Training (ILT) | Live Online Training

Certification: *Microsoft® Technology Associate (MTA): Windows Operating System Fundamentals* — *Exam:* *98-349 Windows Operating System Fundamentals*

Course Description

This course will teach participants knowledge of fundamental Windows operating system concepts in a Windows 10 environment. It will show them how to configure the operating system and install and upgrade client systems. The training also focuses on the management of applications, files and folders, devices, and the operating system (OS). The understanding of various modules is imparted through the hands-on labs.

Target Audience

This course is intended for Individuals who are:

- Interested in acquiring the fundamental knowledge needed to begin building a technological career that uses Microsoft technologies.
- Seeking to prepare for the MTA certification exam.

Prerequisites

To attend this course, participants should have:

- End-user skills with any current version of Windows.

Course Objectives

Upon successful completion of this course, attendees will be able to:

- Understand operating-system configurations.
- Install and upgrade client systems.
- Manage applications.
- Manage files and folders.
- Manage devices.
- Understand operating system maintenance.
