

50433: PowerPivot for End-Users

Duration: 2 Days

Method: Instructor-Led Training (ILT) | Live Online Training

Course Description

This course will teach participants how to use PowerPivot to access data sources, create relationships, use the PowerPivot DAX expressions and generate and format reports. They will also explore how PowerPivot workbooks can be integrated with SharePoint®.

Target Audience

This course is intended for:

- Advanced Excel® users who want to gain familiarity with PowerPivot to build compelling reports.

Prerequisites

To attend this course, candidates must have:

- General Excel and Report building skills.

Course Objectives

Upon successful completion of this course, attendees will be able to:

- Install PowerPivot for Excel.
- Navigate the PowerPivot windows.
- Understand the new features of Excel.
- Import various data sources into PowerPivot.
- Understand how to clean imported data.
- Describe all the new PowerPivot Expressions.
- Use and apply many of the PowerPivot Expressions.
- Describe the different Report types in PowerPivot.
- Create Slicers and Sparklines for more engaging reports.
- Describe the integration points between PowerPivot and SharePoint.
- Publish and setup workbook data refresh in SharePoint.
